Zello.com "VoIP" – ask for info.

Be a custodian if you dare.

We don't own dogs we owe dogs.

They were born wild, born to run wild and were born to eat wild.

We need to step back and think about **commercial mind conditioning.**

When and how did we get to the point of asking is it safe to feed dogs raw meat with fat and bones?

Is it safe to feed raw meats, blood, bone and organs – and whole foods?

When and how did we get to the point of accepting allergies and disease?

When did we get to the point of accepting that dogs cannot walk on grass?

**When did we get to the point of accepting chronic ligament and tendon injuries in animals that are built to run and work all day – when wild dogs and wolves jog, run and hunt 22+ km easily every day!
Did you never see a fat wild dog or fat wolf in the wild?**

When did we get to the point to except commercial high heat prosed dry feeds to be completely nutritional balanced diet and a substitute for species appropriate raw meat, blood, organ and bones – Mother Nature’s own recipe for the canine dog – could this be wrong?

Structural issues in breeds that were built to guard **and work all night or all day** in extreme temperatures?

When did we get to the point **of accepting cooked food and meat, cook eggs, cooked grains, cooked vegetables, cooked fruits and cooked greens, and cooked carbohydrate loaded based commercial feeds** as food for the canine dog?

Intellectuals cutting up dog food with plant protein and **synthetic vitamins** and get “people, feeder, dog owners, and breeders **believing this is a premium diet for dogs?**

Questioning natural dog behaviour?

Ever seen them (dogs and wild canines) **cooking** having a “braai or potjie” under a tree or grazing on greens vegetables or fruits in the wild?

In the corporate life a common and useful technique is **to manage the workforce**, called it “train the trainer”.

Hunters use "call birds" to attract others ... to be shot.

Our minds are being managed **by clever word play**, fear mongering **slick marketing** and "paid off" trusted advisors and "call birds". With this, they manage **your dog and your money.**

They have **trained and conditioned us ... dog owners** – yep you and me and you - to the point where **our own** community and societies health suffers ... let alone our dogs. All the while we pay both with our money, our and also our dogs wellbeing.

Without the natural species appropriate nutrition (Mother Nature's own perfect recipe for canines – our dogs) and natural needed daily exercise (workout as the wild wolf and wild dogs dog do naturally)

you're not worth to be a custodian of the APBT – just see the state our dogs are in ... look around ... fat, useless, immune deficient, sickly, neutered, too thin and micro-chipped.

Come on! ... Step up and handle what you signed up for or get a cat.

This animal ... our dog ... the APBT **is confined** (yep confined in your yard) and **you're the custodian** – you wouldn't keep a goldfish in a marine tank would you?

Come to know what your dog needs to thrive on.

The status might say "trust no one" yet we happily to trust **the gravy train riders and corporate call birds.**

(Either you know this or you don't. Gawie MK)
