DOXYMYCIN QA advertisement what is the medium of administration of the drug?

Empty stomach before food after food with a meal **Step 1:**

Read drug prescription it is very important to know about what drug is given by the doctor, for what condition, and when it needs to be taken in what dose.

This information given by the doctor is called Prescription.

The patients should be familiar with the drug prescription, and the details about the drug before purchasing it and using it.

Some drugs need not be prescribed by healthcare practitioners and can be purchased and used without prescription by the patients; these are called over-the-counter drugs.

Read the drug prescription information of Doxymycin qa drug before taking it.

Doxymycin QA Doxymycin QA is used for:

Treating acne.

Doxymycin QA is a kit containing a tetracycline antibiotic and a cleanser.

The antibiotic works by slowing the growth of bacteria, which helps the body's immune system to kill the bacteria.

The cleanser helps to keep the skin clean. Using both together helps to reduce acne.

Do NOT use Doxymycin QA if the patient are allergic to any ingredient in Doxymycin QA or to any other tetracycline antibiotic (eg, minocycline) you are taking acitretin, isotretinoin, or a penicillin antibiotic (eg, amoxicillin) you have recently received or will be receiving a live oral typhoid vaccine Contact your doctor or health care provider right away if any of these apply to you.

Active ingredients: Doxycycline **Step 3:** Select the most affordable brand or generic drugs.

Generic drug is the basic drug with an active substance in it, and the name of the generic drug is same as active substance most of the times.

Like Acetaminophen/Paracetamol is Generic name and it has different brand names like Tylenol, Acimol, Crocin, Calpol etc.

All these Brand names contain the same Paracetamol, but the drugs are manufactured by different companies, so the different brand names.

Generic drug is always cheaper and affordable, and it can be replaced in place of brand name drug prescribed by the healthcare practitioner.

The Generic drug has same properties as branded drug in terms of uses, indications, doses, side effects, so no need to worry on that. Just select the most affordable generic or branded drug.
