***Procox® oral suspension.***

**Deworment and coccidiacal treatment for opuppies.**

Bayer is proud to announce the launch, a deworming and coccidiacidal treatment especially for puppies.

**Procox®** is the first registered anti-parasitic product effective against 2 common parasites that infect puppies – roundworms and coccidia. Coccidiosis is a disease caused by protozoa which are not killed by conventional dewormers.

**Procox®** is remarkably effective against roundworms and coccidia and will help ensure that your puppies get a healthy start.

**Procox®** is administered in a single palatable dose which may be used in puppies from 2 weeks of age, and is available from your Veterinarian.

Should you require more information please contact me or your local Bayer Agent on the email address or telephone number below.

Adanna van der Merwe  
Brand Manager: **Procox®**
